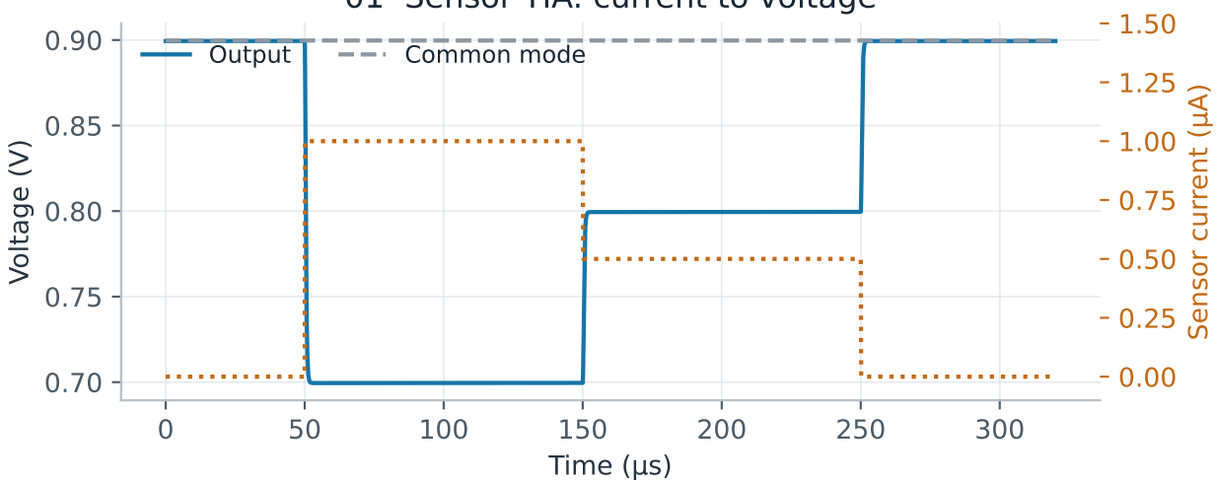
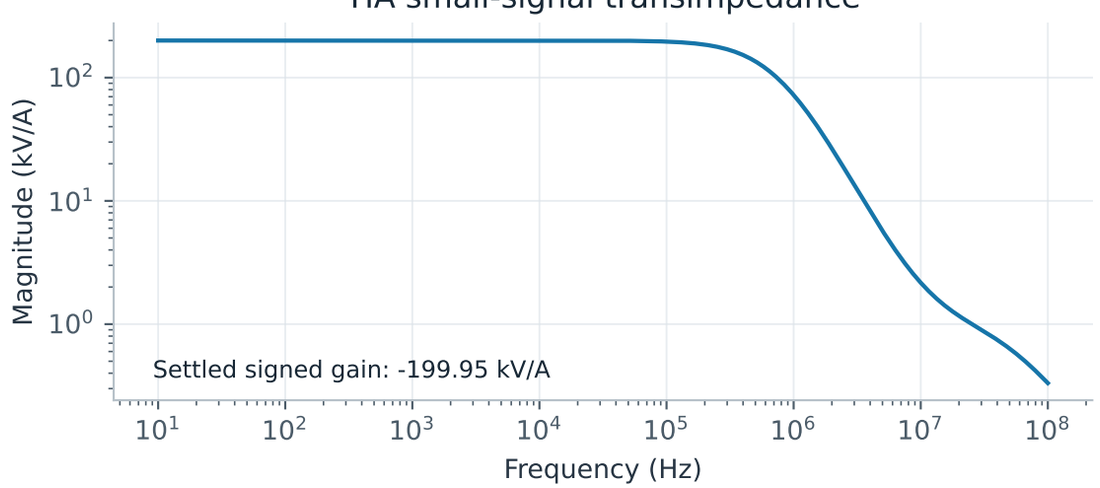
Resistor Indust / Practical analog blocks

Actual ngspice samples · SKY130 MOS · TT / 1.8 V / 27 °C · 100 fF output load

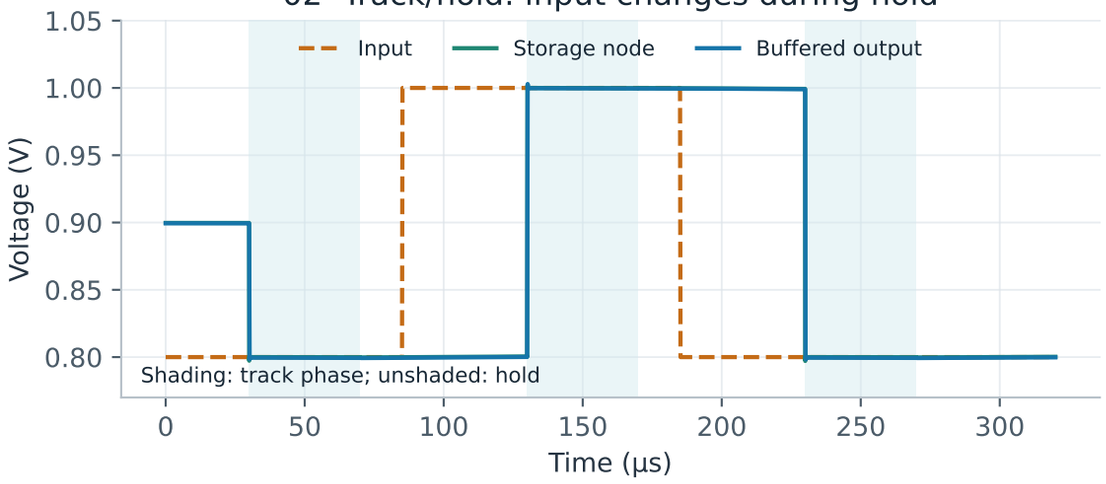
01 Sensor TIA: current to voltage



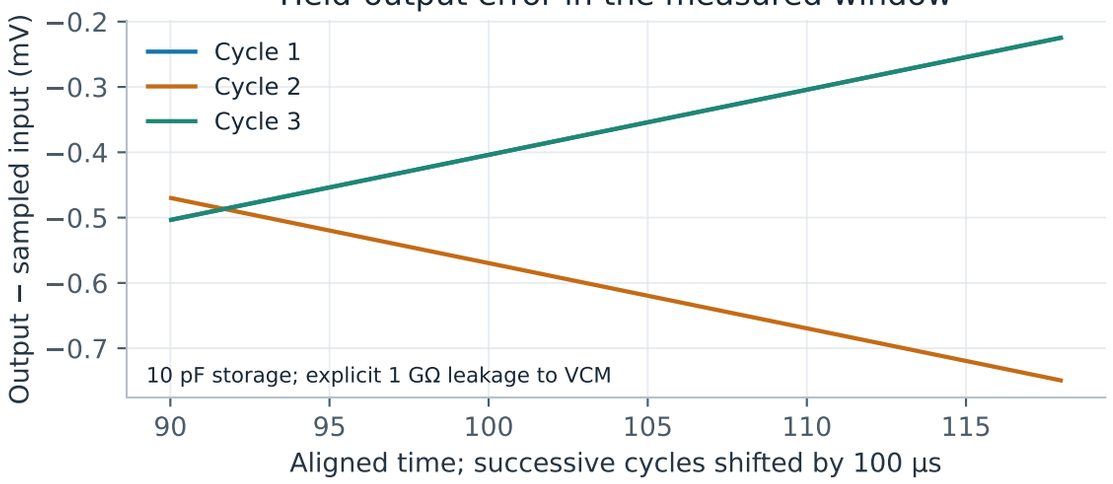
TIA small-signal transimpedance



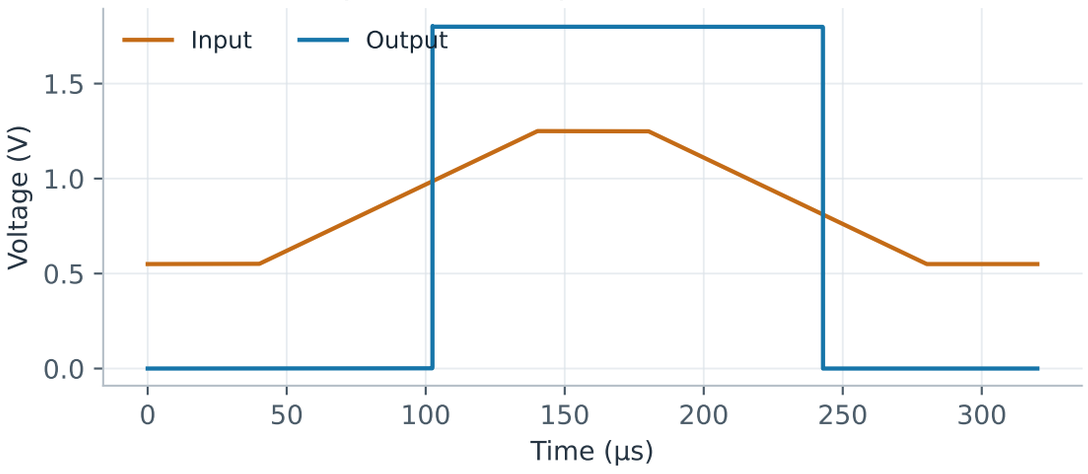
02 Track/hold: input changes during hold



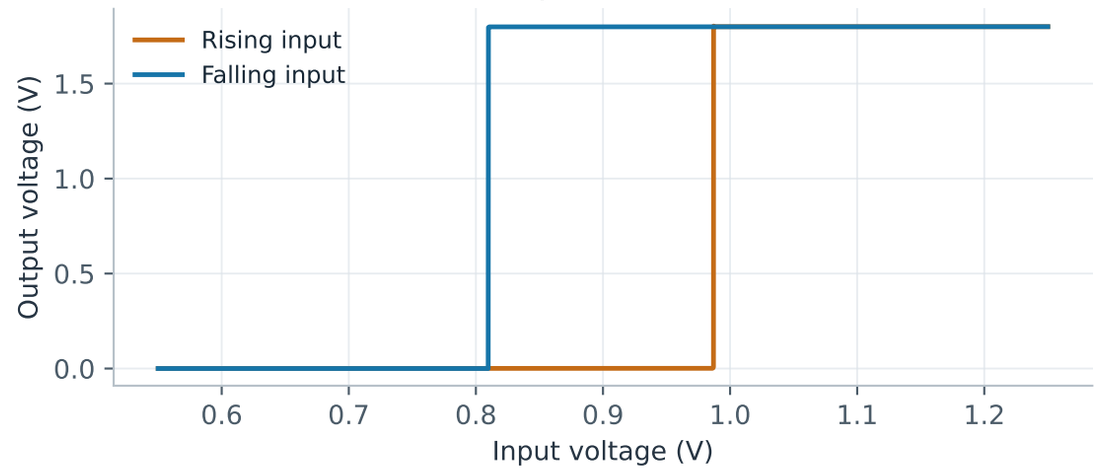
Held-output error in the measured window



03 Hysteretic comparator: two thresholds



Measured hysteresis: 177.2 mV



Schematic references with ideal R/C and external stimuli. No physical layout, extracted parasitics, noise/mismatch or silicon qualification.
